We are Thermory®

Using only heat and steam, we create extremely durable and climate-resistant decking, cladding, flooring, wall paneling and sauna products that are unrivaled in both performance and sustainability compared with the common alternatives such as plastic composites, chemically treated woods and tropical hardwoods.

Thermory wood can be found in more than fifty countries around the world; in homes and public spaces, in a variety of buildings and environments, in high humidity and extreme heat, in warm and cold conditions – our broad product selection meets the needs of hundreds of diverse tastes and styles. Our purchasing process is environmentally responsible and we exercise high standards of quality and sustainability. Our timber is carefully inspected and sourced from sustainably managed forests, never from endangered, tropical or rainforest woodland. If desired, we can offer PEFC, FSC or Nordic Swan Ecolabel-certified wood.

Thermory's interior products inspire beautiful spaces. Timber products are a perfect addition to any renovation or home build and add warmth to a room.

If you want to make a statement or just create a space you'll feel proud of we recommend you try Thermory lining boards as your starting point.

Each tree species, with its distinctive characteristics, gives you the opportunity to play around with the feel of the space and the mood that the wood creates. You can use wood to produce highly effective interior design elements on your walls and ceilings, as well as on work surfaces and more. In addition to enhancing spaces with its intrinsic beauty, using wood in homes and offices helps to create balance – adding a certain softness to otherwise empty spaces and enlivening materials that look or feel cold – while offering timeless elegance and durability.

BENEFITS OF THERMORY'S INTERIOR PRODUCTS:

THERMALLY MODIFIED WOOD

Makes the wood more durable and lowers its moisture content

STABLE

Dimensionally stable in changing weather conditions

PLENTY OF COMBINATIONS

A wide range of tree species and profiles to choose from

DURABLE

Highest class for wood durability

SUSTAINABLE

Wood sourced from responsible forests with chemical-free thermal modification

WOOD INDUSTRY EXPERTS

Over 25 years of experience

DRIFT

DRIFT is an innovative product range by Thermory, featuring boards with a desirable aged look that is achieved by brushing and painting the material. Meanwhile, thermal modification gives the wood both durability

and stability. The luxuriously wide cladding boards, and the rustic yet chic color tones, are suitable for both indoor and outdoor use. Our selection offers intensely modified thermo-spruce in four colors.

PROFILE	COLOR	TREE SPECIES	THICKNESS (MM)	WIDTH (MM)	COVERING WIDTH (MM)	THERMAL MODIFICATION LEVEL
C15 	Black Pearl Sandy Pearl Platinum Smoked Brandy	Thermo-spruce	20	186	175	Intense

DURABLE

Highest class for wood durability

BRUSHED AND PAINTED TOP SURFACE

Gives an aged look and emphasizes the wood grain pattern

EASY MAINTENANCE

No additional painting required – the wood will acquire a natural gray shade over time

All pictures are for illustrative purposes only. Actual products may differ in appearance as wood is a natural material – each piece is unique, just like us.

IGNITE

Hundreds of years ago, Japanese woodworkers discovered that they could prolong the life of wood by charring the exposed surface. This ancient Japanese tradition, known as *yakisugi*, inspired the

striking appearance of our IGNITE cladding boards, which resemble charred wood. The pattern has been embossed in the wood and unlike charred wood, the surface will not stain.

ACCENT
by THERMORY®

ACCENT

Add a color accent to your walls and give your interior a stylish finish with painted wall panels from our ACCENT range. The selection includes a variety of looks, from more modest styles to intriguingly wavy

panels. The heat-resistant and skin-friendly products are coated with natural sauna wax from Tikkurila. The products are suitable for both saunas and general interior use.

The focus of our expertise at Thermory is the process and technology involved in the thermal modification of wood.

Thermal modification is a natural way of enhancing wood. Chemical-free heat treatment makes the wood durable and stable for outdoor use, giving it a beautiful, deep shade and bringing out its natural beauty. Thermory uses the most advanced

technology for treating wood, enhancing it throughout – not only on its outer surface, as is the case with chemical impregnation. As a result, our high-quality boards are stable and durable.

Reduced thermal conductivity

NON-HAZARDOUS WASTE
Safe waste handling

MAINTENANCE

When used in dry indoor conditions, Thermory's wall paneling boards require no additional maintenance. If the wood gets dirty, wipe it with a cloth to remove any dirt and dust.

A vacuum cleaner is sufficient for normal floor maintenance, but if needed you should also clean your floor with a well-wrung cloth or a mop moistened with a cleaning agent. The amount of water used is correct when the floor

is dry approximately one minute after cleaning it.

Find more detailed maintenance and installation instructions on Thermory's website – www.thermory.com.

Leave a lasting impact

THERMORY is a world leader in the thermal modification of wood. We offer high-quality, long-lasting solutions that benefit from environmentally friendly technology. We have spent the past two decades developing our expertise through close collaboration with architects, designers, builders and homeowners – constantly revising our product selection and refining our technology in the process.

THERMORY promotes a transparent and responsible corporate culture. We care about the environment and treat nature with deep respect. Our purchasing process is environmentally responsible, and we exercise high quality and sustainability standards. Our timber is carefully inspected and obtained from sustainably managed forests. If desired, we can offer PEFC, FSC or Nordic Swan Ecolabel-certified wood.

As a renewable material that is both durable and excellent for thermal insulation, wood is one of the most environmentally friendly choices for your construction projects. If protecting our valuable resources to preserve them long into the future is important to you, then we're on the same mission. We create lasting
